## ***DISTRIBUTION***

Limited

24<sup>th</sup> August 2011

PO Box 31963  
Chichiri  
Blantyre 3  
Malawi

Dear Sir

To whom this may concern

Innskor distribution Limited has for the past year been using Enviro Fuel as a major part of our fuel supply. Without the Enviro fuel product our company would not have been able to continue our operations of distribution through out the country.

In the last two years we have been facing serious fuel shortages, with the introduction of Enviro fuels we have been able to supplement and in more recent times almost solely rely on the supply of Enviro fuels to enable our operations to continue.

We have found the fuel to be of excellent quality and are using the product through out our fleet of vehicles and also in our third party transporters. In total we have some 23 vehicles using Enviro fuel.

While closely monitoring the performance of all our vehicles we are very pleased to report that they all continue to perform very well when using the Enviro fuel.

Our company is encouraged to see the development of this Bio Diesel product and look forward to its continued availability to supplement the regular diesel products while at the same time creating employment for Malawians.

Yours faithfully,

Rob Davies

Operations Manager
